# FOR MANY SENIORS, TRAVELING TO SEE A PHYSICIAN IS CHALLENGING.

Transportation obstacles, mobility limitations, visual impairment, constraints due to chronic illness, and fear of getting sick prevent many older people from going to their primary care clinic appointments.

Welcome Health recognized these challenges and developed a primary care model to help you.

# Welcome Health clinicians MAKE HOUSE CALLS!

We bring your primary care to you in the comfort of your own home, from annual wellness visits and sick visits to diagnostic testing such as blood draws, x-rays, and ultrasounds.

More than just prioritizing your convenience, seeing you in the comfort of your own home allows us to get to know you as a whole person, gaining a true appreciation for your family, home, lifestyle, stressors and joys. We see this strong personal relationship between you and your clinician as the ultimate key to better healthcare, helping us help you live the life you imagine.
